<TEXT>I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

We have our cell phone for security with two small children. It is all we can afford! We make few if any long distance calls. We can not afford this change at all!!! why would it be right for us to pay the same or more than a big business or others who make tons of long distance calls. This seems crazy to us and the "usual" way the government works!!!!!!!!!!!!!!
Keep the USF Fair!

Sincerely,

massirider massirider
